Ciriello PLUMBING

PATPAW'S PLUMBING RESCUE MISSION

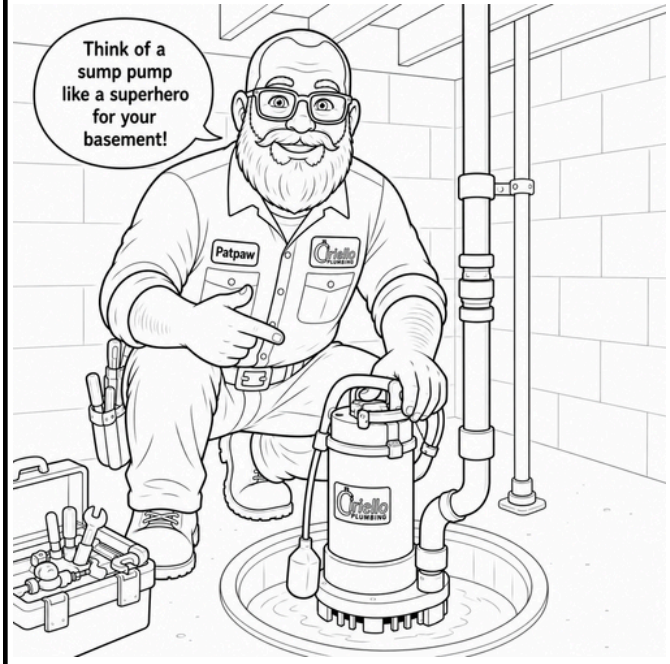

COLORING BOOK

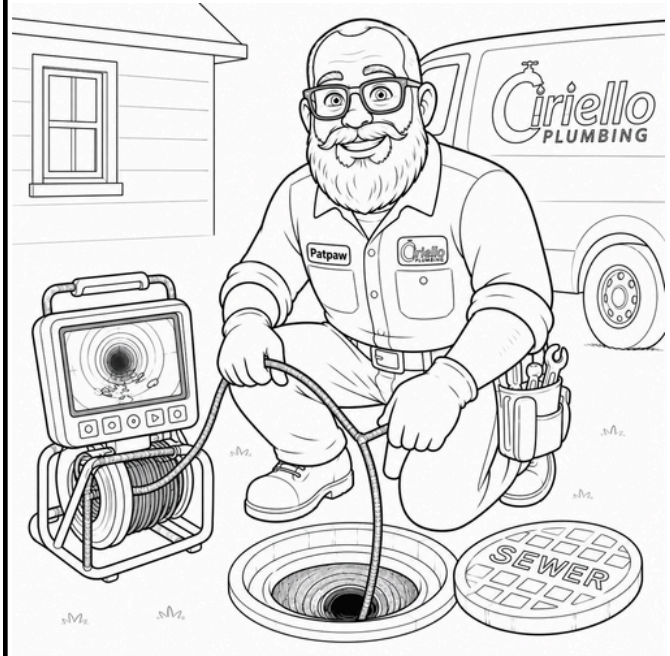

Patpaw is fixing a leaking water pipe and making sure the home's plumbing system is working properly!

Sump pumps help move water out of your home to keep your basement or crawlspace dry and safe!

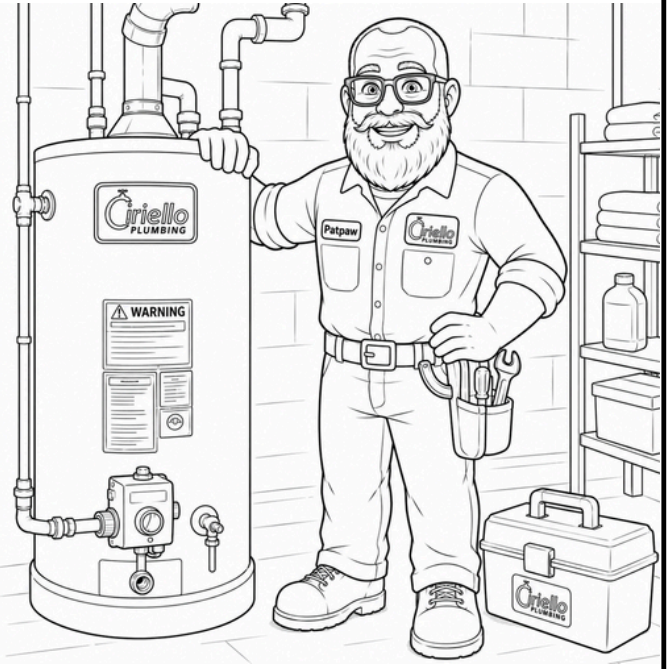

Sewer cameras help plumbers see inside underground pipes to check for problems.

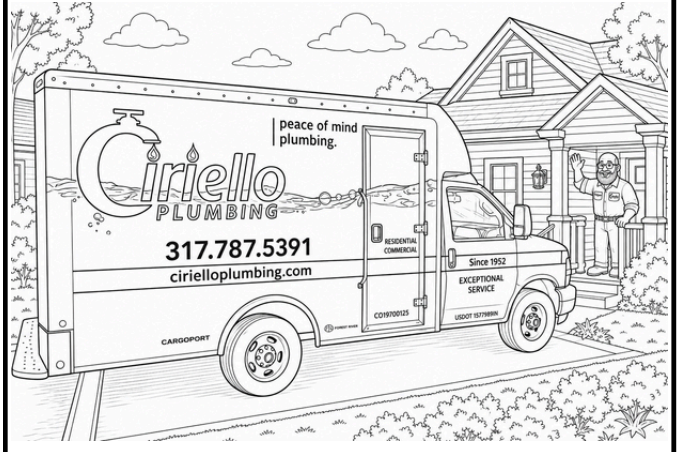

A clean drain helps the toilet flush the right way!

Water heaters give us hot water to help us stay clean and comfortable.

After a hard day of fixing leaks, clearing drains, and helping families, Patpaw completed his plumbing mission and headed home knowing another job was done right!
